ali.raza.tahir@hotmail.com
+971 55 770 1219

• Ali Raza Tahir is a Senior .NET Developer with 6+ years of experience in .NET Core, C#, and cloud technologies (Azure/AWS). He specializes in enterprise applications, secure APIs (OAuth/JWT), and database optimization (SQL Server/Oracle). His DevOps exposure includes Docker, CI/CD pipelines, and microservices, making him adaptable to Kubernetes environments with minimal upskilling. Currently at UAE's Ministry of Human Resources, he combines technical expertise with compliance-driven development.

• Kubernetes Fit:

While not directly mentioned, his skills in containerization (Docker), cloud deployments, and automation align well with Kubernetes orchestration.

• Contact:

ali.raza.tahir@hotmail.com | +971 55 770 1219 | Open to relocation.

Willing to relocate: Anywhere

Work Experience

Senior Programmer

MINISTRY OF HUMAN RESOURCES AND EMIRATISATION-Dubai
May 2024 to Present

Software Programmer – Ministry of Human Resources & Emiratisation (MOHRE)

Location: Dubai, UAE

Key Responsibilities:

• Designed, developed, and maintained enterprise-level applications for MOHRE using .NET Core, C#, SQL Server, and Oracle.

• Developed and integrated secure APIs for internal and external government entities, ensuring seamless communication and data security.

• Worked extensively with MOHRE’s authentication system, including EIDA-based OTP validation, ensuring robust security against unauthorized access.

• Implemented IP whitelisting mechanisms and role-based access control (RBAC) for user authentication and system security.

• Managed and optimized database structures, including stored procedures, triggers, and indexing for high-performance queries.

• Developed UAT (User Acceptance Testing) environment integration to ensure application stability before deployment to production.

• Integrated MOHRE APIs for employment visa processing, labor contract management, and other governmental workflows.

• Automated data processing, validation, and report generation using SQL, C#, and Power BI to improve decision-making efficiency.

• Ensured compliance with UAE government IT security policies and data privacy regulations.

• Collaborated with cross-functional teams, including business analysts, QA testers, and DevOps engineers, to streamline development processes.

Technical Stack & Tools: • Programming: C#, .NET Core, ASP.NET MVC, Web API, JavaScript, jQuery

- Databases: SQL Server, Oracle
- Security: OAuth, JWT, EIDA OTP, IP Whitelisting
- Cloud & Hosting: Azure, IIS Server
- Version Control: Git, TFS
- Tools & Methodologies: Agile (Scrum), Jira, Postman, Swagger

Senior Software Engineer
Tekhqs-Lahore, PK
April 2023 to May 2024

Senior Software Engineer
Macrosoft-Lahore, PK
February 2023 to August 2023

Software Developer
Techverx-Lahore, PK
May 2020 to July 2021

Junior Software Engineer
University of Sialkot-Sialkot, PK
June 2018 to May 2020

Education

Computer Science (BS)
University of Gujrat-Gujrat, PK
September 2015 to October 2019

Skills

- Telerik
- Git
- .NET 9 (Less than 1 year)
- .NET 5
- AWS Cloud
- WordPress
- ABPIO
- JSON
- Blazor Server
- Gitlab
- Entity Framework Core (4 years)
- HTML 5
- SQL
- .NET 6 (2 years)
- TerraForm Architecture

- JavaScript
- Figma Design
- EC2 Instance in AWS
- Docker
- Azure
- Mongo DB
- Jenkins
- Blazor Web Assembly
- Database
- ADO.Net
- Python
- CSS 3
- Restfull API
- Angular 11
- Rabbit MQ
- Bootstrap
- AJAX
- Identity Server 4
- CI CD Pipeline (1 year)
- IAM AWS
- Jquery
- React
- Task Management
- AWS
- React JS
- GRPC (Google Remote Procedure Call) in NET
- PostgreSQL
- Microservices
- Type Script
- Signal R
- Azure Cloud
- Kendo UI
- .NET Core
- .NET 8 (1 year)

Certifications and Licenses

Valid UAE Driving License (Dubai) – Light Vehicle

June 2025 to June 2027

Holder of a valid UAE (Dubai) driving license for light vehicles, enabling flexible mobility for on-site client meetings, project coordination, and inter-emirate travel.
